

Lithium cells south africa

Lithium cells south africa

We deliver complete energy storage solutions within South Africa, offering a wide selection of dependable and cost-effective LiFePO4 cells and Battery Management Systems.

What can I say, other than, what a pleasure it was to buy from Cell Supply SA!!! You will not find service like this very easy anywhere in this country. Darius was so helpful with my order and sorted everything out in literally no time at all. Their service is like nothing I've experienced before. You have a customer for life and I will promote Cell Supply SA every chance I get!!!

Cellsupplysa delivered my order same day and their service is superb. The bms came well presented and Darius did a great job in assisting to connect to the bms. I would recommend Cellsupplysa to anyone.

I am very satisfied with the product and the software is great. The active balancer is useful and keeps the cells balanced perfectly. The bluetooth functionality is very useful. Overall this is a good product.

Phoned for more information on a BMS and there after placed my order . Received it the next day and cannot be more happy with the product quality and service received! Highly recommended!!!!
