

Litime lithium battery reviews

Disclaimer: This product was sent to us for free in exchange for a review. That does not affect our opinion about the product, in this article we list both what we like and dislike. Read more about this here.

It's currently on sale for \$269 over at LiTime and if you use the code thecampingnerd you will get an extra 3% off. It's hard to believe that you can buy a good 100Ah lithium battery for less than \$270.

100Ah is also the max continuous charge/discharge current, which means that it can output up to 1280W. As I'll show in my test results it can put out more than this, but 100Ah is what it's rated at.

So does this mean that it will last one hour if you max the continuous load? No, unfortunately it's not that easy with batteries so you should always overestimate when calculating how much electricity your devices are going to use.
