ENERGY STAR is the government-backed symbol for energy efficiency, providing simple, credible, and unbiased information that consumers and businesses rely on to make well-informed decisions.

Each year, the ENERGY STAR program honors a select group of businesses and organizations that have made outstanding contributions to energy efficiency and the transition to a clean energy economy. ENERGY STAR award winners lead their industries in the production, sale and adoption of energy-efficient products, homes, buildings, services and strategies. These efforts have saved more than 5 trillion kilowatt-hours of electricity over the past 30 years.

"President Biden's Investing in America agenda creates unprecedented opportunities to build a clean energy economy, and private sector partners through programs like ENERGY STAR are leading the way," said EPA Administrator Michael S. Regan. "I congratulate this year's ENERGY STAR award winners for their innovation and leadership in delivering cost-effective energy efficient solutions that create jobs, address climate change and contribute to a healthier environment for all."

Committed to increased usage of electricity from renewable resources from 10% to 40% at Troy, Alabama, site through a green tariff power purchase agreement with South Alabama Electricity Cooperative.

Surpassing energy efficiency benchmarks, our 147K-square-foot Manassas, Virginia facility earned ENERGY STAR certification for the first time, thanks to measures such as LED lighting, self-tinting glass, and raised floor heating and air conditioning, making the building more efficient than 85% of similar buildings nationwide.

Completed 64 energy efficiency projects that are estimated to avoid 25 million kilowatt-hours (kWh) of electricity, 116,000 million British thermal units (MMBTU) of natural gas and \$3.2 million in utility and maintenance costs annually.

BETHESDA, Md., Oct. 23, 2019 /PRNewswire/ -- Lockheed Martin (NYSE: LMT) and TRC Companies ("TRC") announced today a definitive agreement in which TRC will acquire Lockheed Martin Energy's Distributed Energy Solutions group. The sale is part of Lockheed Martin Energy's strategy to focus on products and technology for the energy marketplace and the Department of Defense. Lockheed Martin Energy is a line of business within Lockheed Martin focused on delivering targeted, flexible, affordable and effective energy products to customers all over the world.

Distributed Energy Solutions (DES) is a commercial business principally engaged in providing distributed energy services to electric and gas utility customers. DES provides comprehensive services for energy efficiency, demand response, beneficial electrification, distributed energy resource management, data
