## Luminous solar inverter 1kw price

Luminous solar is one of the best solar brand in the field of solar power. It manufactures solar panel, solar inverter and solar battery and has 1000+ service centers, 2900+ distributors and 60000+ solar systems dealer network in very economical price in India. Luminous solar is 26 years old solar company, founded in 1988. Today, Luminous is a leading solar company with over 5000 employees, 8 manufacturing units and 28 sales offices in India.

Luminous has a dedicated team of solar experts with decades of experience to provide excellence every time. Apart from its domination position in the domestic, residential, commercial, and industrial solar markets, Luminous has a strong foothold in every city in India.

The company was also awarded with "Global Super Brand" in 2011-12 & 2014-15. Luminous solar is passionately committed to bring the latest technology solar solutions to the customers which makes their life comfortable and efficient.

Luminous solar panels are MNRE approved high efficiency solar panel. These panels are manufactured with A-grade solar cells which made them long-lasting, and highly efficient.

Luminous solar manufacture both monocrystalline solar panel and polycrystalline solar panel with a 25 years warranty. Let's know in brief about these solar panels.

Luminous solar panels meet IEC standards and are suitable for a wide range of applications. These solar panels are available from 40 watt 12 volt to 335 watt 24 volt at around Rs. 35 per watt in India.

The efficiency rate of monocrystalline solar panels on the high end is more than 20%. There are two latest models in Luminous monocrystalline solar panels, available at very affordable prices. You can see the prices of these solar panels below.

Luminous solar inverters are smart inverters that are equipped with high-efficiency solar charge controllers. These solar inverters operate smoothly with both solar power and grid power. In addition, there is a unique feature of iSOT that helps to save up to 4 units per day/kW thus substantial savings.

The luminous inverter ranges are versatile and suitable for various appliances at home, at shops, banks, etc. These are pure sine-wave inverters that are completely safe for sensitive home electronics such as TV, personal computers, laptops, and refrigerators, as well as other regular lighting loads. Luminous solar inverters are available in various VA ratings, and the user has a wide choice of solar panel to choose from.

Luminous on grid solar inverters are high-efficiency solar inverters with a maximum efficiency of >97%. It

is used to convert direct current (DC) electricity generated by solar panels into alternating current (AC). There is an easy-to-use informative LCD display that allows you to monitor your consumption in real time.

It has advanced protection features such as short-circuit protection, reverse polarity protection, anti-islanding protection, and residual current detection. In the event of a blackout, the inverter will shut down automatically to prevent the line workers who are sent to fix the power grid.

Luminous Solar NXT PCUs are specially designed for off grid power conditioning unit (solar inverter) with battery applications. Luminous solar PCUs are available in single and three phase with inbuilt MPPT Charge Controller at dealer price in India.
