

# Malabo backup power

## Malabo backup power

CHP is an abbreviation for Combined Heat and Power. It is a technology that produces electricity and thermal energy at high efficiencies. Coal units track this information in the Captive Use section when known.

To access additional data, including an interactive map of gas-fired power stations, a downloadable dataset, and summary data, please visit the Global Oil and Gas Plant Tracker on the Global Energy Monitor website.

Home &gt; News Articles &gt; Zimbabwe's President Commends Equatorial Guinea for Malabo Energy Self-Sufficiency

H.E. Emmerson Mnangagwa, President of Zimbabwe has commended Equatorial Guinea for its success in achieving energy self-sufficiency for its capital city, Malabo, with the country enjoying complete access to electricity in the city backed by power generated from domestic gas.

The Zimbabwean president was accompanied by Equatorial Guinea's Minister of Mines and Hydrocarbons, H.E. Antonio Oburu Ondo, on behalf of H.E. President Teodoro Obiang Nguema Mbasogo.

The MSGBC Oil, Gas &#038; Power conference remains the only event entirely dedicated to exploring energy opportunities in Mauritania, Senegal, The Gambia, Guinea-Bissau and Guinea-Conakry.

Delegates are able to access high-level insights from African policymakers and government officials, one-to-one investor matchmaking services and exclusive oil and gas market forecasts.

Amid first LNG exports and revitalized oil production, the Republic of Congo will host the inaugural forum on March 25-26, 2025, hosted by the Ministry of Hydrocarbons.

If you require further analysis on a project or market African Energy can meet your needs with bespoke consultancy. For more information contact: [email&#160;protected] or +44 (0)1424 721667
