

Malabo electricity

CHP is an abbreviation for Combined Heat and Power. It is a technology that produces electricity and thermal energy at high efficiencies. Coal units track this information in the Captive Use section when known.

To access additional data, including an interactive map of gas-fired power stations, a downloadable dataset, and summary data, please visit the Global Oil and Gas Plant Tracker on the Global Energy Monitor website.

ECP, in partnership with the Ministry of Mines and Hydrocarbons, announced the launch of its Africa Energy Series: Equatorial Guinea 2021 campaign - comprising a report and documentary - that will serve as a critical tool to navigate the energy investment landscape of one of Africa's more mature petroleum-producing markets. To participate in the upcoming Africa Energy Series documentaries, please contact and to advertise or sponsor, please contact .

The MSGBC Oil, Gas & Power conference remains the only event entirely dedicated to exploring energy opportunities in Mauritania, Senegal, The Gambia, Guinea-Bissau and Guinea-Conakry.

Delegates are able to access high-level insights from African policymakers and government officials, one-to-one investor matchmaking services and exclusive oil and gas market forecasts.

Amid first LNG exports and revitalized oil production, the Republic of Congo will host the inaugural forum on March 25-26, 2025, hosted by the Ministry of Hydrocarbons.

Home > News Articles > Zimbabwe's President Commends Equatorial Guinea for Malabo Energy Self-Sufficiency

H.E. Emmerson Mnangagwa, President of Zimbabwe has commended Equatorial Guinea for its success in achieving energy self-sufficiency for its capital city, Malabo, with the country enjoying complete access to electricity in the city backed by power generated from domestic gas.

The Zimbabwean president was accompanied by Equatorial Guinea's Minister of Mines and Hydrocarbons, H.E. Antonio Oburu Ondo, on behalf of H.E. President Teodoro Obiang Nguema Mbasogo.

Malabo, the vibrant and economically dynamic capital of Equatorial Guinea. In this article, we will delve into the fascinating economy of Malabo and explore the opportunities shaping its future. From its thriving oil industry to the push for economic diversification, we will uncover key aspects that make Malabo a destination of interest for investors and entrepreneurs.

Malabo stands out as a key hub in Equatorial Guinea's oil industry. With significant oil reserves, the

Malabo electricity

city has experienced substantial economic growth in recent decades. Investments in oil exploration and production have driven infrastructure development and made a significant contribution to the local economy.

In addition to its role in the oil industry, Malabo has emerged as an attractive tourist destination. Its picturesque beaches, rich culture, and unique architecture attract visitors from around the world. Investments in luxury hotels, restaurants, and tourist services are shaping a growing sector, offering opportunities for tourism entrepreneurs.
