They are is using a high-efficiency solar cell manufactured by Panasonic and covered with a "color louver film", which allows cells to blend into the roof while exposing them to the sun above, and finally a tempered glass on top for durability.

The company says that the "typical homeowner can expect to pay \$21.85 per square foot for a Solar Roof" and started taking orders for the US on May 10 with an online price estimate calculator powered by data from Google Sunroof project

It comes with a lifetime of the house warranty and 30-year power generation guaranteed. After the electricity production, Tesla estimates that its solar roof will be cheaper than regular tile roofs or virtually pay for itself through electricity savings.

In May 2017, Tesla started taking orders with a \$1,000 deposit for the first versions of its solar roof tiles and the product was sold out well into 2018; within the first few weeks.

In recent years, solar energy has become an increasingly attractive option for homeowners seeking to reduce energy costs and lower their carbon footprint. Among the top choices for solar panels is Tesla Solar-- the automaker's solar installation division. If you're considering switching to solar power, understanding Tesla's solar panel pricing and offerings can help you make an informed decision. In this article, we'll break down Tesla Solar panel prices, factors that affect costs, and whether investing in Tesla's solar products is worth it for your home.

Tesla has paused scheduling new solar roof installations in most markets in the US. It's not clear what's happening, but the deployment of the solar product is at a crawl and way behind Elon Musk's goal.

Tesla has achieved its best solar deployment in the US residential solar market since back in 2017 after acquiring SolarCity, but its solar roof deployment is still at a crawl.

Tesla has communicated to employees and some customers that its supply chain issues are now extending its solar roof product, and for now, it is stopping scheduling for new installations.

Late Tuesday evening, Tesla CEO Elon Musk weighed in on a controversial topic in California: the state's solar tax proposal. Musk tweeted that California's proposal was a "bizarre anti-environment move by govt of California."
