Nuku alofa panasonic solar panels

NNUP is the upgrade and modernization of the electricity network in the Nuku'alofa Area, in 5 phases which encompasses the 5 areas of Nuku'alofa. NNUP will help to reduce network losses, increase access to electricity, provide safe and reliable electricity supply to approximately 8,472 households and businesses in the greater Nuku'alofa area, and improve TPL's operating and maintenance capability.

Tonga Power Limited is Tonga's sole electricity provider. We generate, distribute and sell electricity to 25,043 customers in the Kingdom of Tonga, including the outer islands of "Eua, Ha"apai & Vava'u.

According to the Bank's website, the project will convert the distribution network of the Nuku'alofa with climate resilient infrastructure. The project will (i) convert the open overhead network to covered area bundled conductors, (ii) replace overhead consumer connections to underground cables, (iii) convert existing old distribution poles to climate resilient high standard poles, and (iv) replace ageing distribution switchgear. The project will target the Area 5 of the Tonga Power Limited (TPL)'s overall plan of converting all 5 areas of Nuku'alofa network.

ADB has a two-stage appeals process for requesters who believe that ADB has denied their request for information in violation of its Access to Information Policy. You can learn more about filing an appeal at: <https://>
