

Off-grid energy storage 50 kWh

Off-grid energy storage 50 kWh

The system features an "all-in-one" design providing customizable microgrid and energy storage solutions for remote locations. It enables harnessing of local renewable resources for power generation while giving users full control over these distributed energy assets. With robust integration tailored for isolated communities and eco-sensitive areas, the solution delivers reliable and sustainable energy access powered by the sun, wind and other indigenous resources.

Air cooling design, industry-leading standardized heat dissipation cabinet, precise and efficient temperature control, energy consumption control superior to competitors.

Our experienced professional sales engineers will assist you with solar street light price quotations and technical proposals according to your specific project requirements.
