Off-grid systems seychelles

Energy Solutions Seychelles (ESS) is a locally owned and operated company founded by entrepreneur Richard Hoareau. With a strong commitment to climate change mitigation, local renewable energy capacity building, and supreme client satisfaction, ESS provides turn-key solutions in renewable energy and energy-efficient products. Their offerings include photovoltaic PV systems, solar thermal hot water, and energy efficiency consultation.

Established in 2012, ESS anticipated the implementation of the Government of Seychelles Energy Act 2013. Since its inception, the company has played a significant role in contributing to the local grid network's clean renewable energy. Through the installation of roof-top grid-connected photovoltaic (PV) systems or off-grid PV systems, ESS clients have offset a large portion of the national carbon footprint.

At ESS, our mission is to continue leading the green revolution in Seychelles through energy education and the implementation of renewable energy technologies. We take pride in providing outstanding customer service and premium products. Our aim is to install panels, inverters, and batteries sourced from top international suppliers.

- o Clean Energy Contribution - Our clients' installations have contributed over 1 MW of clean renewable energy to the local grid, making a significant impact on reducing carbon emissions.

- o Better Technology - We stay up-to-date with the latest advancements in renewable energy technology, ensuring that we offer our clients the most efficient and cost-effective solutions.

Energy Solutions Seychelles is a locally owned company at the forefront of the green revolution in Seychelles. Through their expertise in renewable energy and energy-efficient products, they have made significant contributions to the local grid's clean energy capacity. With a focus on customer satisfaction and the use of cutting-edge technologies, ESS continues to be the preferred choice for energy solutions in Seychelles.

Battery back-up or off-grid solar PV systems in Seychelles are completely independent of the electricity grid network. Other terms may include stand-alone, battery back-up or hybrid photovoltaic systems.

For instance, they are ideal if you want to be independent of the energy producer or live in a remote location/island, such as Seychelles. Additionally, batteries are added to the solar PV system to store sun energy for use at night.

These batteries are lighter and more compact than traditional lead acid batteries. In addition, they also have a longer lifespan and higher depth of discharge. Hence, making these batteries perfect for Seychelles hot humid conditions.

Off-grid systems seychelles

We supply and install high quality solar energy systems and solar hot water products in the Seychelles. Our aim is to provide reliable technologies including photovoltaic panels and dependable installation service.
