Panasonic solar panels riga

The largest solar panel park in Latvia will be built in the territory of the Port of Riga in Spilve meadows with a nominal capacity of at least 100MW and a planned electricity generation of at least 100,000MWh per year, which corresponds to the annual electricity consumption of an average large Latvian city. It is the first step in the implementation of an ambitious Spilve industrial park project.

The developer of the solar panel park will be selected in an international competition launched by the Freeport of Riga Authority. The territory of 176ha is planned for the development of the solar park, which provides the potential for the creation of a park of at least 100MW. In the selection of applicants, several parameters are to be evaluated - the land rent, as well as the green energy that the producer will transfer to the port for the implementation of its core business.

"It should be noted that the "green" component, i.e. compliance with the European climate neutrality goals, energy efficiency requirements and the availability of renewable energy resources, is one of the essential prerequisites for attracting international funding, such as the support of the European Investment Bank, providing opportunities for other investors to develop their business projects at the port," emphasized V. Zeps.

Lai ?? t?mek?vietne darbotos, tiek izmantotas oblig?ti nepiecie?am?s s?kdatnes. Ar J?su piekri?anu papildus ?aj? vietn? var tikt izmantotas anal?tikas s?kdatnes.

Darba uzdevum? ir paredz?ta saules pane?u uzst?d??ana un piesl?guma izveido?ana pie 110 kV l?nijas, k? ar? augstsprieguma un vid?ja sprieguma apak?stacijas izb?ve topo?? R?gas br?vostas Spilves industri?l? parka teritorij?.

"??da m?roga un tv?ruma projektu realiz?cija atk?rtoti apliecina, ka m?su ostas nav tikai piest?tnes kravu p?rkrau?anai, bet inov?ciju, ra?o?anas un ekonomisk?s att?st?bas centri. Invest?ciju piesaistei ost?s ir j?b?t m?su priorit?tei un amb?cijai ekonomisk?s izaugsmes nodro?in??anai," uzsver ekonomikas ministrs Viktors Valainis.

SNG Solar uzvar?ja R?gas br?vostas p?rvaldes r?kotaj? izsol? par zemes nomas ties?b?m un maija s?kum? R?gas br?vostas valde l?ma par l?guma sl?g?anu ar Lietuvas uz??mumu. Kop?j?s provizoriski paredzam?s invest?cijas parka izveid? var?tu b?t no 60 l?dz 80 miljoniem EUR.

"Esam gandar?ti piedal?ties tik v?rien?g? saules ener?ijas parka projekta ?steno?an?, kas vienlaikus sniedz ar? lielisku iesp?ju att?st?t ?o R?gas br?vostas teritoriju. M?s patiesi ceram, ka m?su nemain?g? p?rliec?ba un tic?ba za?aj?s ener?ijas n?kotnes potenci?lam, k? ar? m?su kop?gais darbs projekta ?steno?an?, rezult?sies R?gas "ener?ijas p?rl?", kas sp?s apg?d?t pat?r?t?jus ar t?ru ener?iju daudzu garum?," akcent? SNG

Solar ?ener?ldirektors Sergei Badulia.

SNG Solar ir saules ener?ijas projektu vad?bas un att?st?bas uz??mums, kas pied?v? saviem klientiem pilna m?roga saules ener?ijas projektu risin?jumus, iek?aujot visu pieg?des ??di un uzst?d??anu. Saules ener?ijas projektu un saules parku att?st?b? uz??mums darbojas jau 10 gadus. Kop? ar investoriem un partneriem SNG Solar ir realiz?jis apjom?gus saules ener?ijas projektus Baltij?, Eirop? un Centr?l?zijas valst?s.

Nosl?gt? l?guma nosac?jumi paredz, ka zemes nomas maksa sast?v no div?m komponent?m, kur viena ir nosol?t? summa EUR un otra - nosol?t? summa elektroener?ijas pieg?dei attiec?gaj? elektroener?ijas ra?o?anas period?. Saska?? ar izsoles rezult?tu, l?gum? noteikt? gada nomas maksa veido 233 251 EUR un R?gas br?vostas p?vvaldei nododamais elektroener?ijas apjoms b?s 2,5% no kop?j?s sara?ot?s za??s ener?ijas, kas t?l?k tiks izmantota ostas infrastrukt?ras uztur??anai un ostas oper?ciju nodro?in??anai.

According to the auction Regulations, the rent fee shall consist of two components - the annual rent component, expressed in euros, and the electricity component to be transferred to the Freeport of Riga Authority, expressed as a percentage of the total amount of electricity produced in the solar park.

“We are pleased that there was such fierce competition between the bidders during the auction, which exceeded our expectations, as a result we will get both a favorable (territory) rent fee and green energy for the port and port stevedores, thus promoting the competitiveness of both existing port entrepreneurs and new investors. Moreover, it will promote the inflow of multi-million investments in Riga, the production of renewable electricity and the progress towards achieving the goals of the Green Deal and energy independence”, emphasized V. Zeps.
