

People's Republic of China solar energy for the environment

People's Republic of China solar energy for the environment

The Renewable Energy Law is a framework policy which lays out the general conditions for renewable energy to become a more important energy source in the People's Republic of China. It covers all modern forms of renewable

It sets middle- and long-term targets for the total volume of renewable energy development, and, on the basis of this, will prepare national plans for the implementation of these targets. (see Article 1)

In drawing up these targets and plans, it will cooperate with the regional and local people's governments to reflect regional differences in the final plans. Renewable power generation projects will have to obtain an administrative permit to proceed with project development should there be more than one application for the same project licence, an open tendering process will be held. Pro

(Adopted at the 14th Meeting the Standing Committee of the Tenth National People's Congress on February 28, 2005; Amended according to the Decision of the 12th Meeting of the Standing Committee of the 11th National People's Congress of the People's Republic of China on December 26, 2009)

Article 1 This Law is enacted for the purpose of promoting the development and utilization of renewable energy, increasing the supply of energy, improving the structure of energy, safeguarding the safety of energy, protecting environment and realizing a sustainable economic and social development.

Article 2 For the purpose of this Law, "renewable energy" refers to non-fossil energies, such as wind energy, solar energy, hydroenergy, bioenergy, geothermal energy and ocean energy, etc.

The application of this Law relating to hydropower shall be set forth by the administrative department of energy of the State Council and be submitted to the State Council for approval.

Article 4 The state shall give priority to the development and utilization of renewable energy in energy development and promote the establishment and development of the renewable energy market by setting an overall target for the development and utilization of renewable energy and adopting corresponding measures.

The state shall encourage economic subjects of different ownership to participate in the development and utilization of renewable energy and shall protect the legitimate rights and interests of those who develop and utilize renewable energy .

Article 5 The administrative department of energy of the State Council shall conduct unified administration of the development and utilization of renewable energy throughout the country. Other relevant departments of the

People s republic of china solar energy for the environment

State Council shall, according to their respective functions and duties, conduct administration of the development and utilization of the relevant renewable energy.

The administrative departments in charge of the energy work of the local people's governments at and above the county level shall conduct administration of the development and utilization of renewable energy in their respective administrative regions. Other relevant departments of the local people's governments at and above the county level shall, according to their respective functions and duties, conduct administration of the development and utilization of the relevant renewable energy.

Article 6 The administrative department of energy of the State Council shall organize and coordinate the investigation of renewable energy throughout the country and, in conjunction with other relevant departments of the State Council, organize the formulation of the technical criteria for resources investigations.
