To access additional data, including an interactive map of global solar farms, a downloadable dataset, and summary data, please visit the Global Solar Power Tracker on the Global Energy Monitor website.

DescriptionThe project is being developed and currently owned by The Sandi Group. The company has a stake of 100%. Kinshasa Solar City PV Park is a ground-mounted solar project.

Power purchase agreementThe power generated from the project will be sold to Societe Nationale d'Electricite under a power purchase agreement. The power will be sold at the rate of \$0.095kWh for a period of 25 years. The capacity to be procured is 1,000MW.

About The Sandi GroupThe Sandi Group is a diversified company engaged in construction, logistical support provider, water treatment, oil and business development.

Blending expert knowledge with cutting-edge technology, GlobalData's unrivalled proprietary data will enable you to decode what's happening in your market. You can make better informed decisions and gain a future-proof advantage over your competitors.

This information is drawn from GlobalData's Power Intelligence Center, which provides detailed profiles of over 170,000 active, planned and under construction power plants worldwide from announcement through to operation across all technologies and countries worldwide.

The BOOT (build, own, operate, transfer) solar energy project in Kinshasa, the capital of the Democratic Republic of Congo (DRC) is launched. Named "Kinshasa Solar City", it will allow the installation of several solar photovoltaic power plants near Kinshasa, with a cumulative capacity of 1,000 MWp.

The first phase of the BOOT solar project, a specific form of public-private partnership (PPP), was launched on August 19, 2020 in Menkao, a rural district of the Maluku commune 74 km from Kinshasa, by the DR-Congolese Head of State Felix Antoine Tshisekedi. This step aims at the installation of several solar photovoltaic power plants, with a combined capacity of 600 MWp.

Sun Plus which won the contract to install the first photovoltaic solar power plants with a total capacity of 600 MWp. For both phases, the company is expected to invest one billion dollars. TSG's subsidiary, The Sandi Group, signed a 25-year power purchase agreement (PPA) with the National Electricity Company (Snel).

The project will also provide jobs, as the TSG's workforce represents only 10% of the

necessary personnel,” said Rubar Sandi, managing director of the TSG (The Sandi Group).

Exemptions, particularly on imports (customs duties and duties of any kind) are also provided for in the agreement signed between Sun Plus and the DRC government. The land that will house the various photovoltaic solar power plants will be offered for “free” to Sun Plus.
