Porto novo battery performance

The RANGER SPACEPRO XL Reclining Wheelchair takes power mobility to unparalleled levels, combining advanced engineering, luxurious comfort, and thoughtful design. With a 21" seat width between armrests--2 inches wider than its predecessor--it offers an expanded seating area for users seeking greater flexibility and ergonomic support.

As part of the renowned Ranger series, the SPACEPRO XL Reclining features a fully adjustable reclining backrest with a convenient side lever, allowing users to easily change positions. This functionality enhances lumbar support for individuals with back pain, aids in relieving pressure, and offers greater comfort for extended use. Whether you're reclining for therapeutic reasons or simply to relax, the backrest adjusts smoothly to provide customizable comfort.

Despite its heavy-duty construction, this model remains the lightest in its class, weighing just 43 lbs (without batteries) and 50 lbs (with batteries), thanks to its handcrafted carbon fiber frame. Built to navigate curbs, grass, and rugged terrain with ease, the RANGER SPACEPRO XL Reclining is your ideal partner for freedom, durability, and style.

The 2025 RANGER SPACEPRO XL Reclining Wheelchair is the perfect fusion of comfort, performance, and style. Designed for those who demand flexibility, support, and durability, this wheelchair allows you to conquer your day with ease while enjoying unmatched comfort. Whether navigating rugged trails or relaxing at home, the SPACEPRO XL Reclining elevates your mobility experience to new heights.

The Ranger SpacePro XL Reclining Wheelchair combines premium design, durability, and unmatched comfort for a luxurious mobility experience tailored to your needs.
