

Powin energy corporation

Powin energy corporation

Choosing an energy storage partner is a strategically important business decision with long-term implications. There are many factors to consider: safety, security, cost, technology, parts, and maintenance--the list goes on. Powin simplifies this decision by providing an approach that helps customers mitigate risks at every step. Our commitment ensures seamless and reliable Battery Energy Storage […]

By Mark Babcock, Chief Revenue Officer, Powin Powin is proud to be recognized among the world's leading energy storage providers in S& P Global Commodity Insights' 2024 Battery Energy Storage System Integrator Report, ranking within the top four globally (excluding China) and securing a position as the third-largest provider in the U.S. by megawatt-hours deployed and […]

This is how we charge forward A Clean Energy Future is Within Reach In a world shaped by rapid changes--climate action, pivotal elections, and evolving global dynamics--we see endless opportunities to make a positive impact. With each shift, our resolve only strengthens: energy storage is the way forward. October reaffirmed that for us with significant […]

There's more to October than pumpkin spice lattes and jack-o'-lanterns. It's also Cybersecurity Awareness Month, as declared by the US Congress in 2004. It is a month for public and private sectors to work together to raise awareness of cyber threats on a local, national, and global scale. Earlier this month, we shared some of […]

It's that time of year again--October is here, and that means it's Cybersecurity Awareness Month! October was declared Cybersecurity Awareness Month by the President of the United States and Congress in 2004. It is a month for public and private sectors to work together to raise awareness of cyber threats on a local, national, and […]

Harnessing Energy, Inspiring Change. Bigger than batteries. Three simple words. And yet, they've come to embody something greater for us. They're a reminder that our work is about something bigger than technology. It's about a carbon-free future for all. In September, we took big steps in the right direction and achieved some major milestones. We're […]

At RE+, North America's largest clean energy event, we were proud to engage in conversations shaping the future of renewable energy. Now in its 20th year, the conference brought together industry experts to exchange ideas, showcase innovations, and explore solutions for a sustainable future. Among these sessions, our own Mike Wieteki, Senior Vice President of […]

By Brian Kane, Chief Projects Officer at Powin (Originally published on Renewable Energy World) As any energy industry professional will tell you, California and Texas are in a league of their own when it comes to

Powin energy corporation

renewable generation and deployment. California, which produces more solar energy than any other state, has been furiously installing utility-scale battery energy […]

All BESS equipment for the entire 850MW/1,680MWh system has been delivered and installed Powin has successfully delivered and installed all Battery Energy Storage System (BESS) equipment for Australia's 850MW/1,680MWh Waratah Super Battery (WSB) Project in New South Wales, marking a significant milestone in the project's development. This achievement highlights Powin's technical leadership, resilient supply chain, […]

The energy landscape is changing fast, and at Powin, we wanted to better understand how the average American is preparing for their future energy needs. Countless reports have determined that energy demand is skyrocketing due to data center usage which is exacerbated by AI, more electric vehicles on the road, and home electrification. In short, […]
