

Sealed junction boxes

Sealed junction boxes

With innovative products designed for the electrical contractor, Allied offers a complete line of wall and ceiling boxes for use in energy efficient homes to aid in sealing the exterior walls and ceilings per construction methods outlined in 402.4 of the 2009 International Energy Conservation Code.

(A) Patented (U.S. Patent #6,908,003 B2) flexible polyurethane flange available for sealing box to air/vapor barrier. Flange products "V" are for single drywall and "V2" are for double drywall applications

The current and projected status of energy codes and standards adoption is shown in the map below. Status is displayed for both residential and commercial buildings for U.S. States and territories. Click on the image below to check the status of your state's energy code adoption.

Our IP68 connection boxes from the Black Series are engineered for maximum protection and durability in the toughest environments. These sealed boxes are crafted from premium thermoplastic material, ensuring resilience and longevity in various applications.

The Black Series connection boxes are designed to meet high protection standards, offering IP55, IP65, and IP68 ratings. This means they are dust-tight and can withstand prolonged immersion in water, making them ideal for outdoor and harsh conditions. Additionally, they provide excellent impact resistance with IK07, IK08, and IK09 ratings.

These surface-mounted boxes are available with or without cones, providing flexibility to suit your installation needs. Whether you require a box with additional cable management features or a more straightforward design, the Black Series has you covered.

Our IP68 connection boxes are perfect for a wide range of applications, from industrial to residential projects. Their superior sealing capabilities and robust construction ensure that your electrical connections remain safe and secure, even in the most demanding conditions.

Choose the Black Series for unbeatable protection, versatility, and performance in your electrical installations. Trust in our sealed boxes to deliver the reliability you need for all your critical connections.
