

Self contained off grid home

Self contained off grid home

haus.me is absolutely self-sustainable and off-the-grid. This home doesn't need to be connected to electricity, water, or sewage. No propane tanks, no firewood.

Only clean energy and sustainability as a core focus. Off-grid solar power, water generation from air condensation, and autonomous sewage - haus.me can make your life more comfortable everywhere without limits and without bills, saving you up to \$3600 in annual energy costs!

This autonomous house is designed for comfort. It is pre-equipped with everything you need - furniture, fully-equipped kitchen, Sonos speaker system, Nest camera, thermostat, Apple TV, 100" projector screen, 24/7 internet connection, and even a fingerprint doorlock.

haus.me is a one-of-a-kind, integrated, intelligent home. The house possesses 24 intelligent subsystems that work together to ensure you are living safely and comfortably. The house can make decisions to help and protect you. It can listen. It can speak.

Smart air quality, oxygen, and carbon gas level control systems
Reverse osmosis water quality control system
with artificial mineralization
HEPA antibacterial and antiviral protection

Wall insulation in haus.me is 6x higher than US Dep. of Energy recommendations for northern states and Canada. Our windows save 14x more energy than a regular double pane window.
