

Smart grid 400 kWh

Smart grid 400 kWh

Smart RESPONSE Bi-Directional Power Converter with 3Level IGBT Technology, has dual-function storage capability which enables the energy available during the day to be stored in cyclic batteries, then converted and fed back into the network as usable AC current that is injected into the grid. Smart RESPONSE PCS provides an outstanding conversion efficiency factor for both charging and discharging phases. Fully compliant with smart grid systems to import and export power inline with the voltage and frequency regulations, FFR and DFFR schemes required by utilities to support the grid.

Bi-directional Power Converter For Demand Response Fully DSP Controlled, 3Level IGBT Technology Ideal for Demand Side Response and Frequency Regulation functionality Quick Power Transfer / System Response Time Wide Battery DC Voltage Range
