The France Solar Energy Market size is estimated at 22.96 gigawatt in 2024, and is expected to reach 44.68 gigawatt by 2029, growing at a CAGR of 14.24% during the forecast period (2024-2029).

The COVID-19 outbreak in Q1 of 2020 had a major impact on energy systems around the country, curbing investments and threatening to slow the expansion of key clean energy projects. Factors such as rising demand for clean energy solutions, increasing investments, and expansion of solar energy capacities are expected to be major drivers for the France solar energy market during the forecast period. However, the widespread generation of electricity from nuclear power is expected to be a major restraint on the growth of the French solar energy market.

Solar energy is heat and radiant light from the Sun that can be harnessed with technologies such as solar power (used to generate electricity) and solar thermal energy (used for applications such as water heating). The solar energy market is segmented by type and PV deployment. The market is segmented by type into solar photovoltaic (PV) and concentrated solar power (CSP). By PV deployment, the market is segmented into rooftop and ground-mounted. The market sizing and forecasts for each segment have been done based on installed capacity (GW).

The French solar energy market is moderately consolidated. The key players in the market include (not in particular order) Engie SA, EDF Renewables, Albioma SA, TotalEnergies SE, and meeco AG, among others.

EDF is a company that offers energy solutions and services to individuals, businesses, and local communities. They focus on providing accessible and reliable electricity while promoting energy conservation and sustainability.

ISEC is an Institute for Science and Technology focused on circular economy and low-carbon energy. The institute offers expertise in sustainable systems engineering, primary and secondary resources, advanced materials, waste management, and industrial pollution. It applies its circular economy knowledge to various low-carbon energy challenges including wind, solar, hydropower, and hydrogen. ISEC collaborates with academic, institutional, and industrial partners to expand its knowledge and offers research-based training opportunities.

Solar energy companies france

EDF Renouvelables is a world leader in renewable energy solutions. They offer a wide range of renewable energy services including wind, solar, microgrid, and emerging energy projects. With a focus on innovation and sustainability, EDF Renouvelables is committed to providing clean and efficient energy solutions to meet the growing global demand.

Voltaia is a global company operating in the renewable energy sector. They offer a range of services, including solar, wind, hydro, biomass, and storage solutions. The company is dedicated to improving the global environment and provides support to customers throughout the entire project lifecycle, from conception to operation and maintenance.

ENGIE Green is a leading renewable energy company in France, specializing in customized wind and solar energy projects. They offer innovative and sustainable solutions tailored to each territory, aiming to actively contribute to the energy transition. ENGIE Green provides personalized support and renewable energy solutions that are 100% renewable.

Neoen is a specialist, independent power producer that focuses on producing renewable, competitively-priced energy on a large scale. They have a long-term vision and aim to have 10 GW of renewable energy in operation or under construction by 2025.
