

## Solar energy monaco

You are making a direct contribution to one of the goals of the Principality's energy transition: increasing the proportion of renewable energy in the country's consumption. All "Go rate" electricity consumption includes certificates of renewable origin. SMEG certifies that the equivalent of the electricity consumed by all "Go rate" customers has been produced from renewable sources.

**Certificate of Renewable Origin:** SMEG provides you with a Certificate of Renewable Origin certifying that the equivalent of the electric energy consumption supplied for all "Go rate" customers has been produced from energy sources of renewable origin for the year 2021, only available on your customer area.

Green electricity purchased in the Principality of Monaco accounts for around 75% of total consumption. Green electricity is any electricity produced from a renewable energy source. This currently includes: solar energy (including photovoltaic and thermal), wind energy, tidal energy, wave energy, hydroelectric energy, geothermal energy and biomass.

\*Power is the capacity of your domestic installation to simultaneously operate all the electrical equipment in your home. It is expressed in kVA (kilovoltampere).

The contract is signed for a minimum period of 1 year and is automatically renewed. After one year's consumption, you can request a price analysis to make sure your contract is the best for your needs, or simply access your online simulation by logging in to your customer area.

This catalogue outlines the technical services offered by SMEG as Manager of the Public Electricity and Natural Gas Distribution Network in the Principality of Monaco. SMEG reserves the right to modify the content of this catalogue to reflect technical or regulatory developments.

Services are provided on working days (Monday to Friday excluding public holidays) and during working hours. Working hours for the provision of services are from 8am to 5pm.

Exceptionally, and subject to our teams' availability, certain services may be carried out :- on the day of the request, with an additional charge ("same-day" activation or restoration service).- outside working days and hours, with an additional charge.
