

Solar energy storage system 85 kWh

Solar energy storage system 85 kWh

Adding a Generac home standby generator up to 26 kW provides virtually endless* backup capabilities, giving you the ultimate peace of mind. An integrated generator will automatically kick on to power the home during an outage when battery levels get low, giving the battery time to recharge and eventually switch back.

An ecobee thermostat integrates seamlessly with PWRcell 2 to monitor outages and automatically adjust temperature set points to preserve stored energy. It also provides a convenient in-home display for anyone in the home to view outage details and battery status in real time.

Easily monitor energy consumption and solar production, battery use and savings over time right from your phone. Plus, when you toggle on Outage Guard*, your system will automatically shift energy to fill your PWRcell batteries to ensure you'll have maximum backup power when storms and outages are likely in your area.

PWRcell 2 is currently available in select markets only. Answer a few questions so we can see if PWRcell 2 is available in your area and connect you with an independent installer who can provide a custom quote.

As subject matter experts, we provide only objective information. We design every article to provide you with deeply-researched, factual, useful information so that you can make informed home electrification and financial decisions. We have:

Incorporated third-party data and information from primary sources, government agencies, educational institutions, peer-reviewed research, or well-researched nonprofit organizations.

We won't charge you anything to get quotes through our marketplace. Instead, installers and other service providers pay us a small fee to participate after we vet them for reliability and suitability. To learn more, read about how we make money, our Dispute Resolution Service, and our Editorial Guidelines.

This is an unbiased review: EnergySage is not paid to review brands or products, nor do we earn money from affiliate advertising in this article. The content of this blog is based on research and information available at the time of writing. Learn more about our mission and how we make money as a company.

A qualified EnergySage-approved installer can give you the best information about the sonnen eco home battery system and other energy storage options available to homeowners today.
