Like many other European countries, the Czech government is creating incentives and introducing programs to make solar energy more attractive. In general, Prague, the capital city, offers good conditions for the use of solar energy thanks to its long sunshine hours. PV systems are becoming increasingly popular, both for reducing industrial and private CO2 footprints, in addition to making households less dependent on the

electricity market. Of course, this requires experts, for example for professional installation of PV-projects. This article introduces 3 PV installers from Prague.

The Solek Holding SE is a Prague-based solar energy expert focusing on the construction and operation of solar power plants. Since their founding in 2010, the company has established a track record of 288 MWp installed capacity. Solek offers their services, which include development and EPC, mainly for large-scale and ground mounted PV-projects in Europe and Latin America. They also evolved to offer the installation of rooftop PV- plants based off of their decade-long experience.
