

Solar plus

Solar plus

SolarPlus is the most complete residential solar design software available, with a full suite of tools including a customer management system, system design, financial modelling and compliance workflow..

SolarPlus empowers your team to generate accurate designs in minutes with pre-loaded solar + storage system templates, string configuration guides and preloaded consumption load profiles and tariffs.

Our flexible mapping options are designed to suit every budget, including high-resolution images from MetroMap and Nearmap and stunning 3D visualisations that allow you to set building heights, plot trees and a shade derating calculator to demonstrate solar access and shading at any time of the year.

Give your customers everything they need to make an informed decision with a detailed savings and financial analysis, including peak demand reporting, peak shaving and a lifetime cash flow breakdown.

The SolarPlus Smart Energy Simulator takes savings modelling well beyond solar and batteries; adding hot water, load shifting & EV smart chargers - demonstrating to customers how multiple savings stack up.

The Quick Quote Workflow is designed for getting quotes out fast and winning more sales and with the side-by-side comparison quote your customers will be able to easily compare your system recommendation with other options.

Blow your competitors out of the market with beautiful proposals that are fully customisable for your branding and include system upgrades, discount or margin-based pricing and easy-add finance options.

The built-in customer management tool allows you to track leads directly from your website, right through to sign-up, payment and installation. Manage and communicate directly with prospects directly in the app and have clear insight into the status of each prospect. Track solar sales by sales representative and quote status, report on cashflow projections and full sales history.

Your reputation in your local area relies on professional and compliant system installations. Reduce unsatisfied customers and call-backs with a complete compliance workflow including fully automated SLD creation, job packs, job safety analysis, boilerplate T& Cs and one-click system handover manuals to keep your operation lean and maximise profits.

SolarPlus is the only solar design software designed to cater to the varying needs of small residential installers, commercial engineers, off-grid designers and large retail teams.
