

# Solaredge monitoring platform

## Solaredge monitoring platform

Learn how to use the SolarEdge monitoring platform to monitor the technical and financial performance of your solar sites. Find out how to register, log in, set use...

Get a detailed real-time view of your entire fleet from a single, easy-to use platform. Track, manage and optimise the performance of multiple SolarEdge systems with smart tools which let you access the specific data you need.

Streamline your operations and minimise system downtime with remote troubleshooting and diagnosis. Stay ahead of issues that could potentially impact system performance and easily identify sites that require immediate attention with automated system alerts.

The monitoring platform provides enhanced PV performance monitoring and yield assurance through immediate fault detection and alerts at the module level, string level and system level.

No hardware or wiring is required to transmit data from the power optimizers to the inverter: the monitoring sensors and transmitters are built into the SolarEdge power optimizer and solar inverter, and measurement data is transmitted over the regular power lines.

Get a detailed real-time view of your entire fleet from a single, easy-to-use platform. Track, manage, and optimize the performance of multiple SolarEdge systems with smart tools which let you access the specific data you need.
