

Sunrun rechargeable battery systems

Sunrun rechargeable battery systems

Power your home your way with flexible options to own, finance, and or lease Sunrun's premium solar plus storage solution. We've simplified the the cost of solar battery storage. And, since we tailor all of our solar plans to help meet the needs of your home and lifetsyle; you can count on Brightbox to be ready when you need it most.

You only have to turn on the news to know that storms are getting worse,³ and infrastructure is becoming increasingly vulnerable to unpredictable weather.⁴ With Sunrun Brightbox(TM), you can boost your energy independence with solar storage that puts you in control.

Simplicity - Solar battery storage prices don't have to be complicated. You can finance an energy storage solution of your own, or lease Brightbox from Sunrun. With Sunrun's Brightbox, we keep solar battery storage costs efficient and affordable so you'll never be left in the dark again.

Our premier solar battery system meets the unique needs of your state to bring you one step closer to energy independence. If we aren't in your state yet, stay tuned--we're headed your way! Brightbox is currently only available to new Sunrun customers. Want to learn more? Contact us today.

Sunrun, a residential solar, battery storage and energy services provider, is bringing its rechargeable solar battery system, Brightbox, to all of the company's active markets. Sunrun currently has more than 13,000 Brightbox systems nationwide, and this announcement will expand access to millions of new potential customers.

Record storms, heatwaves and wildfires this year have uncovered vulnerabilities with the electric grid's aging infrastructure, leaving millions of people without power. Usually lasting for several hours, recent power outages have come while millions of Americans have transitioned to working and schooling from home due to the COVID-19 pandemic.

Sunrun's Brightbox offers homeowners the ability to power through such power outages with clean, reliable and immediate home energy. From May to September 2020, existing Brightbox customers powered essential needs during grid outages for a total of 7,583 hours, or about 315 days.

"Sunrun has been delivering affordable solar to communities across the U.S. for 13 years, and now we can provide resiliency with energy storage," said Lynn Jurich, Sunrun CEO and co-founder. "By bringing our Brightbox system to all of our markets, we'll ensure families and communities consume even more of the clean energy they produce, rely less on dirty fossil fuels and have power when they need it most."

Sunrun rechargeable battery systems

Beyond backing up home power needs, in some markets, these systems can also share stored power across communities through aggregated, local clean energy networks known as “virtual power plants.” Participating Brightbox users strengthen the electric grid in their neighborhoods, helping decrease blackout events for their entire community.

“We lost power for six days during Hurricane Isaias,” said Andy Robles, a Brightbox owner in Oakdale, New York. “The battery kicked in and I was able to power through the six-day blackout while safely working from home. Sunrun’s Brightbox system was a game changer and I’m glad more people will have access to this crucial technology.”

Brightbox, which previously served customers in 11 states (California, New York, Hawaii, Texas, Florida, Nevada, Colorado, Arizona, Vermont, Massachusetts, New Jersey) and Puerto Rico, is now available to residents in eight additional states (New Hampshire, Connecticut, Rhode Island, Pennsylvania, Maryland, Illinois, South Carolina and New Mexico) and Washington, D.C.

“Sunrun’s Brightbox offers homeowners the ability to power through such power outages with clean, reliable and immediate home energy. From May to September 2020, existing Brightbox customers powered essential needs during grid outages for a total of 7,583 hours, or about 315 days.”
