Tamara Jude is a seasoned content writer with more than seven years of experience in research and content production. She specializes in the solar energy, home warranty, and windows categories. Her interest in home improvement began as a child, when she regularly completed home projects alongside her parents.

Roger is the Director of Go Solar Programs at Solar United Neighbors. He has been in the solar industry for more than three years after a decade of entrepreneurship. With a background in community organizing, Roger is dedicated to empowering communities to go solar.

With so many solar panels to choose from, finding the right ones can feel overwhelming. We've spent more than 300 hours researching the best solar panels available to help you narrow down your choices. Learn more about each of our top panels, their benefits, and how they impact your solar investment in our guide.

We like Sunrun for its four financing options, including its unique leasing options if you don't want to own your system. This stands out to us because the other companies on this list don't offer as many options.

Prepaid and leased systems also include a 25-year warranty with system service and maintenance, ongoing monitoring, and theft insurance. The company even offers financing plans for quality monocrystalline solar panels and products from trusted brands such as LG.

Sunrun earned 4.4 out of 5 stars based on our methodology. The company gained many points for its positive reputation, comprehensive leasing options, and well-rounded warranty coverage. It lost some points for its limited service selection.

Available in: California, Colorado, Connecticut, Florida, Hawaii, Illinois, Massachusetts, Maryland, Nevada, New Hampshire, New Jersey, New Mexico, New York, Pennsylvania, Rhode Island, South Carolina, Texas, Vermont, plus Washington, D.C. and Puerto Rico.

The company earned DroneDeploy's 2022 Guardian of Safety Award for incorporating drone technology in its site assessments. In 2021 and 2022, Sunrun was recognized by Comparably with 14 awards. Its accolades include Best CEOs for Diversity 2022, Best Company Culture 2021, and Best Company for Women two years in a row.

Sunrun currently holds an A+ rating from the BBB and is accredited. Former customers praised the comprehensive coverage for leased systems but complained about delayed installations, poor customer service, and poor communication with project managers. Additionally, some customers note being confused by Sunrun's leasing and PPA options, though they also mention Sunrun is willing to discuss and clarify these plans.

Solar Energy World (SEW) is one of the most robust and well-regarded solar installation companies. It boasts several impressive features, such as its 30-year manufacturer's warranty. Its service area is limited, and it doesn't offer energy auditing services. We like that SEW discloses what solar panels it primarily works with and that the panels are from trusted, quality brands such as Qcells and Silfab.

SEW scored 4.4 out of 5 stars according to our methodology. The company received many points because of its warranty, which is longer than most other solar companies' warranties. SEW offers a 30-year manufacturer's warranty on all its solar panels and inverters, whereas many providers only offer 25-year warranties.

SEW offers a 30-year manufacturer's warranty on all purchased solar panels and inverters. However, coverage varies by brand, and the company doesn't guarantee them with every panel option.
