Mounting is remarkably easy. It's also designed with non-slip rubber for an added level of security. It's designed for series 24 and 27 batteries. If you're using an inflatable pontoon or a smaller jon boat, this could be ideal. The box measures 17 inches x 12 inches x 10 inches.

The box remains secure and sealed when you're using any accessories or running your motor. You can easily charge your battery in the box as well by connecting it to a charger.

Newport Vessels is based in California. Their customer service has proven to be very friendly and responsive. If you have any issues, they should be able to address them quickly and easily for you.

The box is a little pricier than some, but it's clearly well made. It's tough, durable, and versatile. If you want a real standout advanced battery box, this is a great choice.

The Minnkota trolling motor battery box is the best in the business. This is a real standout. Featuring dual circuit breakers this trolling motor will more than meet your needs. And keep your electronic devices safe and secure.

The external battery terminals are easy access, no need to worry about opening the case. Compared to a lot of the competition, this is a simple feature that can't be overlooked. You won't be spending a lot of time trying to get access.

Minn Kota is an American company with a great track record. Their name comes from where the founder used to fish near the Minnesota North Dakota border. The company actually created the first gear-driven electric trolling motor. So you better believe they know what anglers and boaters need on the water. Their customer service is second to none, as is the quality of the products they make. That's why this is our choice for the best battery box on the market.

Attwood has the distinction of being a brand that can merge good quality and low prices. Their heavy duty battery box is a great example of this. If you've used Attwood products in the past, you know they can get the job done. Then look at the price tag and heave a sigh of relief. You can buy this thing with the change in your car's console. There's a reason Amazon has it listed as one of their best sellers.

The box itself is simple enough but amazingly durable. From -20 F to 120 F it can handle a massive temperature range. It's been drop tested to ensure it can handle it all. The straps are able to handle up to 350lbs of force, so don't expect the lid to fly open and dump your battery out of the blue.

The box itself is 10.12 inches x 18 inches x 21.75 inches. It's designed to handle series 27 batteries. The

handles are large enough to accommodate some big hands. If that sounds silly to you, then count yourself lucky. If you have big hands, the little handles on some of these boxes can be a pain to deal with. The edges are rounded too, which is another nice touch.

Mounting hardware is included, but take note, you will need to drill some holes in it. The vents are also located on the top. That means you'll need to be cautious of where you mount the box. The potential for spray or rain to get in is there if not mounted safely.

Elephant cases are tough little battery boxes. This is seriously a commercial grade battery box. It looks like a tool box and it can handle a serious beating. At the same time, it offers a lot of versatility. The box fits standard 12V-7AH / 9AH marine batteries. It also features dual 2 pin polarized connectors (25A). They're waterproof even when the cap is off, which is a nice feature.
