

United arab emirates battery testing

With better quality and service, we are doing our best to meet our customer's needs and provide the services Emirates National Batteries Factory is proud of being the first lead acid battery manufacturer in the emirate. In addition to the high skilled factory management with long experience in the field and the efforts of the R& D team helps to be one of the most innovative battery companies in the world.

We take advantage of our state-of-the-art manufacturing and testing facilities to build the most advanced products on the market. Our company is passionate about helping its customers succeed, and we truly believe that in return it is our success. We aim to grow with our valued customers and aspire to influence the world through the strength we provide together.

SGS battery testing services can identify your target market regulations for cells, batteries and modules to ensure compliance with contractual or regulatory requirements.

Developing the highest quality batteries, that are safe and reliable, is a complex challenge in today's competitive global market. We can provide expert testing services for abuse, benchmarking, durability, electrical, electromagnetic compatibility (EMC), environmental, life cycle analysis, performance, safety standards and transportation on cells, batteries and modules.

Expert and experienced, we conduct battery comparison testing against both national and international standards, as well as battery life cycle analysis. With an increasing focus on renewables and energy efficiency, we also carry out testing for renewable energy storage systems and energy efficient battery management.

Our ISO/IEC 17025 accredited testing laboratories and specialized local experts have extensive experience with battery testing, and offer a range of services to manufacturers and buyers in the industry. With unrivaled experience we can provide all the required technical verifications, safety settings and factory auditing services.
