“We are looking forward to working with BayWa r.e. on a strong launch into Southeast Asia,” said David Ranhoff, chief commercial officer at Enphase Energy. “The solar market in Southeast Asia has great potential for Enphase, particularly in the small- to medium-sized commercial rooftop market segment. We believe Enphase's unique value proposition of high-output performance and flexible installation, as well as a safe low voltage all-AC system architecture will resonate well.”

Having built a reputation on its comprehensive range of quality products and industry-leading customer service, BayWa r.e. believed it was important to align with a brand that the company could stand together with confidently.

“We are pleased to join forces with Enphase to distribute its seventh-generation microinverters in Southeast Asia,” said Daniel Gaefke, managing director, BayWa r.e Solar Systems Co., Ltd. “The demand for solar in Southeast Asia is growing rapidly, and Enphase's products' ease of installation, superior energy production, smart monitoring system, and reliable, safe operation are some of the key reasons we chose to offer them to our customers.”
