

Wind turbine 1000 watt

Wind turbine 1000 watt

FREE Delivery is available to Prime members. To join, select "Try Amazon Prime and start saving today with FREE Delivery" below the Add to Cart button and confirm your Prime free trial.

Important: Your credit card will NOT be charged when you start your free trial or if you cancel during the trial period. If you're happy with Amazon Prime, do nothing. At the end of the free trial, your membership will automatically upgrade to a monthly membership.

3. The surface of the wind turbine is coated with a special process that provides excellent resistance to oxidation and corrosion under any harsh conditions, as well as excellent corrosion resistance, water resistance and sand resistance.

1. Take out the wind turbine, put the wind turbine on the tower and align it with the flange hole. Mount the four flat gaskets on the four bolts, then insert the bolts into the holes corresponding to the flange. Tightening the screws by hex key.

2. The three wires of the wind turbine are connected to the transmission cable, each pair of wires is not less than 30 mm, and the tape at the connection end is at 100 mm.

1. The wind turbine should be installed where there is strong wind or no tall buildings and obstacles, If installing the wind turbines near the obstacles, the position is better as far as possible from obstructions, or the installation height should be 20Ft higher than the top of obstructions (As show), which can make full use of the wind power.

3 ing molded through precise injection with new process, together with the optimized design of aerodynamic contour and structure, our wind turbine blades have such advantages: high utilization of wind energy which contributes to the annual energy output.

4. Our generators, adopting patented permanent magnet rotor alternator, with a special kind of stater design, efficiently decrease resistance torque of the generators.

To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzed reviews to verify trustworthiness.
