

Yaounde solar thermal energy

Yaounde solar thermal energy

In 2013, the company WILMOSOLAR was founded. While the solar market explodes in the world, WILMOSOLAR makes itself available to the public and offers high quality services. For us, the sun is by far the greatest source of renewable energy. That is why we want to make it possible for everyone to benefit from this energy. Hence our slogan Renewable energy for all.

"As a solar site technician, it is my duty to always ensure the quality of the material I use. This is a task I can do without when I work with wilmosolar. They always provide high quality material with a guarantee that gives a great security."

"I called on wilmosolar to overcome the numerous energy outages. At first I was very hesitant about the efficiency and costs of a solar installation. They quickly proposed a solar kit according to the energy needs of my company and today my company can operate non-stop without having to fear any load shedding."
